RISHAB MEHRA

Software Development Engineer

A person trying to create programming a means to change how people perceive the world.

WORK EXPERIENCE

Software Development Engineer 1

OYO Rooms

07/2019 – Present

One of the largest and fastest-growing hospitality chain of leased properties.

Gurgaon

Achievements/Tasks

- Migration of Oyo Vacation Homes (OVH): Currently working in authentication and authorization team involving migrating the whole system of OVH from the Progress ABL to the Java Spring tech.
- Worked on Property Owner Portal (OyoOs.com): Found and resolved the bugs which were causing the discrepancies in the analysis reports at the property owner's side. Revamped the "Day Closing" activity for the properties which helped in generating daily reports for the owner.
- Built a configuration system: The system can control the visibility of various features, dashboard view settings on OyoOs. It helped in releasing new features seamlessly. Technology used: Spring framework and MongoDB.

Software Development Intern

OYO Rooms

01/2019 – 06/2019

Gurgaon

Achievements/Tasks

- Created a translations management system: The system could solve the problem of storing redundant "message.properties" files in each micro service which caused the redeployment of the services not involving any code changes. Created a UI in React and the backend in Spring Framework.
- Built a drawer system for OyoOs: The drawer system which helped the property owners to track the cash flow at their end. This also helped to create various analysis reports at owner's end.

Software Intern

DRDO-RCI

05/2017 – 06/2017

Responsible for creating defense missiles for Indian Gov.

Hyderabad

Achievements/Tasks

- Developed an interface to control the electrical devices remotely using LABView software.
